

eco clipper® mowers are the **economical solution** for mowing large area turfgrass:

- High quality finish
- High capacity
- Contour following
- Cutting height: 20 till 90 mm
- Minimal soil compaction
- Good dispersion of clippings
- Insensitive for wheater conditions
- Efficient electric drive
- Low noise
- Low in maintenance
- Built with experience

eco clipper® EC-TM10,  
10 m cutting width

**eco clipper®** Our tri-deck mowers!

eco clipper® EC-TM12,  
12 m cutting width

Based on our flexibly linked, 3 rotary blades mowing modules of 106 cm wide, we offer different versions of a tri-deck type towed mower from 8 m up till 14 m cutting width.

All these eco clipper® mowers leave a high quality finish and are contour following, enabling cutting heights from 20 mm till 90 mm. Mowing capacity is high with speeds from 12 km/h till 25 km/h depending on conditions.

The eco clipper® mowers are light weight on large tyres, which minimizes soil compaction and enables faster grass root development. The side decks can be shifted in order to change trails.

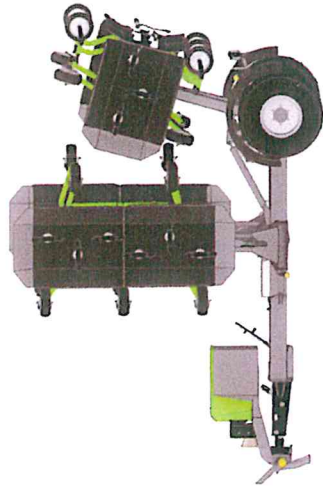

What's more is that the mowing result is not very sensitive to wheater conditions. This means that the mowing can be planned to follow the growing of the grass. The removal of excessive clippings after wet periods can be minimized.

**That is why eco clipper® mowers are the economical solution for mowing large area turfgrass.**
